Beijing Jiaotong University

Physics Experiment Report Paper

Experiment Title:_____

Date: _____Year____Month____Day **Time:** _____

Student ID: _____ Name: _____

School: _____ Class: _____

Experiment Score

Items	Pre-Lab Report	Experimental Operation	Data process & Questions	Total
Score				

Instructor's Signature:

Notices

Doing preparation before the Lab, write the pre-lab report.

1. Before coming to the lab, read the pertinent literature on the experiment carefully.
2. Write the pre-lab report according to specifications.
3. Prepare the raw data sheet before coming to the lab.

Operating seriously in the Lab, observe and understand the phenomena.

1. Come to the Lab punctually, following the guide of instructor;
2. Familiarize yourself with the experiment according to the rules of operation;
3. Don't exchange the instrument you used only if you get the permission of instructor;
4. Take note of all relevant data on the raw data sheet that must be checked and signed by the instructor, if failure, you should perform the experiment again;
5. Obey the rules of the lab, be care of instrument. If you accidentally break some instrument, please report it to instructor as soon as possible. If you operate improperly and the instrument be damaged, the certain compensation be required.
6. Arrange the instrument and left neatly after getting the permission of instructor.

Summing up after the lab, accomplish the experiment report.

1. Arrange the raw data on this report paper;
2. Finish data processing and error analysis, represent the data and give conclusion;
3. Discuss the experiment result, summarize the experience you obtained. Propose comments or suggestions;
4. The Lab report should be handed in the report box of instructor within one week after finishing the experiment.

A completed report should contain:

1. Cover with title, student number, name and date
2. Text of pre-lab report
3. Finished raw data record table
4. Data process and answering questions
5. Graph page (if required)

★★★All the portions must be arranged in order correctly!★★★

The style of pre-lab report:

1. Experiment Purpose
2. Apparatus（Type, Specification）
3. Principle: describe principle simply, computation formula and diagram
4. Experimental procedure: describe the step of experiment briefly.
5. **Blank raw data table (must be completely separated from other parts)**
